

Gentlemen:

I have learned that a new service, Low Power FM, to which some changes are being considered that might impact current FM translator services. I am concerned that this may adversely affect my reception of a particular FM station in my area, KLOV, which broadcasts from California and makes extensive use of translators.

KLOV serves me here in Albuquerque both in its commercial-free programming format and in its broadcast content, which includes music and numerous talk shows of value to me.

I believe the content of KLOV would be lost to Albuquerque if it were no longer available due to being replaced or supplanted by one or more LPFM stations.

I believe that would be a loss to the Albuquerque area. I believe the loss would be esthetic, since I think they provide good quality music; social, since many of the talk shows have helpful content in living day to day; and spiritual, since they are a Christian radio station.

I believe KLOV provides a valuable service, strongly enough that I have supported KLOV with a monthly donation for several years. Please don't allow or cause a change to the broadcast environment that would prevent my receiving KLOV.

Thank- you.
